About RMSE

RMSE is a premier developer of vertically-integrated regional supply chain and manufacturing infrastructure in the biorefining industry.

As such, RMSE has developed proprietary Enterprise Resource Planning (ERP) platforms, Data and Information Management Systems (DIMS), Techno-Economic-Environmental (TEE) modeling frameworks, and Information Technology (IT) platforms with Geographic Information Systems (GIS) logistics and optimization tools. These platforms and technologies form the foundation of RMSE's professional services offerings.

Industry and Business Sectors

Biodiesel, Bio-Fuels Feedstock/Supply Chains, Energy Efficiency Services, Restaurant/Industrial Services, Biomass/Recycling Supply Chain Optimization, Renewable Energy Operations, Financial & Economic Analysis, Integrated Technology and IP Development, Atmospheric Carbon & GHG Mitigation

Key Clients & Customers

1,500+ Restaurants/Food Service Facilities, Commercial Fleets, Commercial Farmers, Diesel & Gasoline Refiners & Distributors

Key Brands

recycOil® Waste Cooking Oil Recycling
bioXchange® Integrated Biofuel Production
TEE Techno-Economic-Environmental Analytics & Decision Modeling

Corporate Address

Rocky Mountain Sustainable Enterprises, LLC
1708 Walnut Street
Boulder, CO 80302

Please visit www.rmse.biz to learn more about how RMSE is "making a world of difference right here at home".

RMSE specializes in advanced efficiency, technology and analytical services. These information-intensive, technology-enhanced services provide our commercial clientele with **cost cutting solutions and expertise**. Utilizing RMSE's proprietary information technology, data management, resource planning, and logistics optimization tools, you will maximize your savings, reduce your energy consumption, and improve your operational and bottom line performance.

TEE - ENHANCED ECONOMIC AND ENVIRONMENTAL PERFORMANCE

- LOWER COSTS
- REDUCED FOOTPRINTS
- MAXIMIZED EFFICIENCIES
- ENHANCED CASH FLOWS

Energy Efficiency Services

RMSE is your one-stop shop providing complete energy efficiency services for your facilities. With a focus on restaurant, casino, sports complex and other facilities, we provide energy audit services, comprehensive municipal, state, federal, and utility energy efficiency incentive reports for each of your facilities, a complete set of energy efficiency, weatherization and equipment recommendations based on your incentive eligibility, performance goals and detailed financial parameters. You will receive a line-by-line analysis of potential cost-savings, return on investment, and itemized payback schedule. Stop wasting your money on unnecessary energy costs, now!

Waste Stream Analysis & Optimization Services

RMSE's analytical modeling platforms will help you optimize your facilities' waste streams. By leveraging off of RMSE's proprietary waste recovery data, supply chain management systems, enterprise resource planning platform, and quantitative modeling expertise, our customers develop a comprehensive understanding of their effluent and output streams, and deploy effective waste reduction, optimization and utilization strategies. There has never been a better time to increase your economic and environmental performance, and we will help you maximize your intelligent waste-resource management decisions!

Supply Chain & Logistics Optimization

RMSE's total supply chain and logistics optimization services improve your bottom line. Our commercial customers operating in the distributed resource, multi-nodal logistics, biomass harvesting and waste/recycling industries save substantial operating costs by implementing our customized supply chain management systems, analytics frameworks, multi-variable report engines, geographic information driven cost modeling, and logistics and cost optimization platforms. Improve your operation's efficiencies with RMSE's robust data, logistics, and cost management disciplines. We focus on the nuts and bolts of your supply chain operation so that you can focus on developing and growing your business!

Techno-Economic-Environmental (TEE) Data & Analytical Services

RMSE delivers comprehensive TEE data management, modeling and analytical services to a diverse clientele. Technology developers – especially renewable energy and biomass/biorefining technology developers – rely on RMSE's sophisticated systems and business modeling expertise to understand their economic performance, operating and capital cost advantages, capital efficiency, and energy and resource efficiency advantages – together with their water, climate and greenhouse gas impacts and footprint reduction opportunities. We deliver results in multi-variable frameworks that are easy to understand and to market to your key technology buyers, policy makers and industry stakeholders. Intelligently manage your core technology and business development by choosing our TEE data management, modeling and analytical services!
